25X1D

The most recent and best-quality photography to date of the Peiping Airframe Plant, China, permits more accurate mensuration and a more detailed examination of the plant's facilities than were possible previously.

25X1D
25X1D

The plant has been expanded from approximately 1.2 million square feet in [] to approximately 3.7 million square feet in []. The new mensuration indicates that the probable hydrostatic test tower is approximately 110 feet high, and the high-bay section on the probable vertical assembly building is approximately 125 feet high. A building resembling an aircraft engine test building is nearing completion in the SE section of the plant. The building contains 2 test bays and has been under construction since []. Some of the facilities cannot yet be identified on the basis of their present stages of construction.

25X1D

25X1D

Three long rail cars measuring approximately [] feet were visible in the north section of the plant on []. A high level of activity could be observed throughout the plant and surrounding areas. The steamplant was in partial operation, roof stains were observed on many of the buildings, and numerous trucks and vehicles were moving in the area. The aircraft count at the adjacent Peiping/Nan-yuan Airfield was as follows: 3 BEAGLE, 1 FARMER, 41 FAGOT, 1 CAB, and 1 COLT.
